CHICKEN HATCHINGS AND POULTRY SLAUGHTERINGS

SOUTH AUSTRALIA

FEBRUARY 1967

Details of chicken hatchings and poultry slaughterings in South Australia for the months of July 1966 to February 1967 and for the year ended 30th June 1966 have been compiled from returns submitted by all known South Australian commercial hatchers and slaughterers. Although the figures may not cover some very small producers, it is considered that the statistics give a high level of coverage of hatchings and slaughterings of meat strain chickens and of hatchings of egg strain chicks in commercial hatcheries which sell day-old chicks.

Particulars of poultry slaughtered are given in Table 1. The second table shows numbers of eggs set and chicks hatched in commercial hatcheries.

Any discrepancies between totals and sums of components are due to rounding.
